The following maintenance instructions are designed to minimise the cost factor, without compromising the long-term appearance of your floorcovering.

Once the installation is complete, do not traffic for 24 hours until the adhesive has dried and then:

#### INITIAL CLEAN

- Remove all loose debris and ensure that all traces of dried adhesive are removed from the surface of the floorcovering.
- Mop sweep or vacuum to remove dust and grit.
- Damp mop with a neutral detergent.
- Rinse thoroughly with clean water and remove residue.
- If required, buff with a rotary machine fitted with a clean red pad.

#### ROUTINE MAINTENANCE

The following recommendations are provided as a guideline, and the frequencies can be changed to optimize the appearance.

##### DAILY

- It is suggested that maintenance should be carried out at least once a day and if heavily trafficked more frequently.
- Mop sweep or vacuum to remove dust and loose dirt.
- As required, spot clean to remove stubborn marks with an alkaline cleanser. Rinse and remove residue.
- Damp mop entire area.
- As required, buff to restore finish.

##### WEEKLY/MONTHLY

- Assess the appearance of the floor.
- As required, scrub with a scrubber dryer **fitted only with a red pad**, and using neutral cleanser (pH 7 to 9).
- Rinse thoroughly with clean water and remove residue.
- As required, buff to restore finish.
- Stubborn black marks can be removed by using the centre disc of a scrubbing pad and a small amount of undiluted alkaline cleanser. Place the disc under the sole of the shoe and rub - this gives greater pressure. Rinse the area well with clean warm water and allow to dry.

- The maintenance regime requires the installation of an effective barrier matting system.
- Cleaners and detergents should be diluted as per the manufacturers' instructions. For recommended products, see the Polyflor approved maintenance products sheet.
- Always follow the Health and Safety guidance provided.
- For further guidance, contact Polyflor Customer Technical Support on +44 (0)161 767 1912, or email tech@polyflor.com..
- At the date of issue the data presented is correct. However, Polyflor Ltd. reserve the right to make changes which do not adversely affect performance or quality.

**REGULAR CLEANING IS MORE BENEFICIAL TO THE FLOORCOVERING AND MORE COST-EFFECTIVE THAN OCCASIONAL HEAVY CLEANING.**
